

'Chemistry & Biology' Away DayTuesday 10th November

Weetwood Hall, Leeds

12.00 – 12.50	Lunch
12.50 – 13.00	Introductions Prof. Colin Fishwick School of Chemistry Dr Pam Jones Biomedical & Health Research Centre
13.00 – 13.30	'Locating previously unexplored regions of biologically-relevant chemical space: from new synthetic methodology to new modulators of the cell cycle' Prof. Adam Nelson School of Chemistry Dr Paul Ko Ferrigno Section of Experimental Therapeutics, LIMM
13.30 – 14.00	'Progress towards the identification of inhibitors of factor A as novel anticoagulants with minimal bleeding risk' Dr Richard Foster Medicinal Chemistry Chemical Biology, School of Chemistry Dr Helen Philippou Division of Cardiovascular and Diabetes Research, LIGHT
14.00 – 14.30	'Enzymology and in vivo behaviour of purine biosynthesis' / 'New probes of protein phosphorylation' Dr Michael Webb School of Chemistry
14.30 – 15.00	'Self-assembling tape-forming peptide gels in physiological conditions as scaffolds for cell growth' Prof. Eileen Ingham Institute for Medical & Biological Engineering Dr Amelia Aggeli Centre for Molecular Nanoscience, School of Chemistry
15.00 – 15.30	Coffee Break
15.30 – 16.00	KEYNOTE SPEAKER 'Drug Development: The industrial perspective' Dr Andrew Mortlock Discovery VP, AstraZeneca
16.00 – 17.00	Open discussions
